Thanks, Susan. I spoke to Jim about it the other day, but had forgotten about your vacation schedule. He'll be there in person for the 28th, so perhaps there is an opportunity to connect that morning.

In any event, I think he is a great person to be involved in finding a good solution.

Enjoy your time off—think positive thoughts J And great to catch up with you in Santa Fe,

John

Subject: Pend Oreille TMDL

Hi John—I am wrapping up my week and will be gone until Wednesday, Aug. 28th. I plan to either attend or call into the EPA meeting on the Pend Oreille Temperature TMDL on the 28th. It just occurred to me that your staff person who is working on the Pend Oreille (Jim Keating?) never contacted me to provide background information on what has transpired with the TMDL and how we interpreted the state and tribal standards from Ecology's end. Anyway, I guess we'll just see where the discussion goes....should be interesting!

Have a good weekend--Susan
